Art Unit: 2627

1. During the Telephone Interview of 17 October 2007, final resolution to the 'new matter' and § 112, paragraph I objections and rejections was determined by interpreting the phrase "composite ratio" as 'composition ratio' which is identified and explained in the specification.

Page 2

Applicant must therefore amend the claims to change all references to composite ratio to composition ratio in response to this action.

- 2. The following action is now proffered and supercedes the final office action of 18 May 2007.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2627

4. Claims 1,2,5-7,17,18,22,24,29-32 are rejected under 35 U.S.C. §102(e) as being anticipated by Amano(PN6801414).

See Fig. 2. Note, to the extent claimed, Amano discloses all the structure to a tunnel junction magnetoresistive device including a composite magnetic oxide layer 105 which is part of a pinned layer and acts to prevent at least one element of the antiferromagnetic layer from diffusing into the tunnel insulating layer. See col.6, lines 4-15; lines 35-47 and lines 61-67.

Of further note; Amano's specification in col.6, lines 16 through 60 details that a composition ratio of MX (specifically lines 18-25) is used to form composite magnetic layer 105.

- 5. Claims 3,4,8-16,19-21,23&28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sharma discloses other pertinent information in this instant art field.

7. For a complete response applicant should identify how the claimed structure of his invention defines over *all* the art of record.

Moreover, where the applicant disagrees with the reasoning and/or application of the prior art on critical points of the claims, they should identify how the claimed structure of their

Art Unit: 2627

invention defines over **all** the art of record not just the applied art.

Where applicant believes that the art is redundant and/or superfluous relative to the critical aspects of the claimed invention the applicant may simply state so in rebuttal summary.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. J. HEINZ whose telephone number is (571) 272-7587. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on (571)272-7582.

The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.
